

The MSP range is environmentally friendly by utilising alkaline aqueous bio-degradable detergents and allows for effective energy consumption using a foot pedal operation that operates the pump only when pressed.

This makes the MSP a very capability unit and a must have for any workshop environments cleaning heavy soiled contaminants.

Technical Specifications

Model	Processes	Cabin Dimensions			Loading Weight	External Size (l*w*h)	Total Power
		Width	Length	Height			
		mm			kg	mm	kW
MSP 860	Washing Brushing	800	600	500	75	1300*700*1570	3,0
MSP 1280	Washing Brushing	1200	800	500	75	1720*900*1570	3,3
